PROCEDURE

	Warning Hot oil and hot components can cause personal injury. Do not allow hot oil or hot components to contact skin.
--	---

1. To avoid contamination of the oil samples, the tools and the supplies that are used for obtaining oil samples must be clean.
2. To ensure that the sample is representative of the oil in the crankcase, obtain a warm, well mixed oil sample.
3. Caterpillar recommends using the sampling valve in order to obtain oil samples. The quality and the consistency of the samples are better when the sampling valve is used. The location of the sampling valve allows oil that is flowing under pressure to be obtained during normal engine operation.
